PROFESSIONAL SUMMARY

Senior QA Engineer / SDET with 4+ years of experience in building and enhancing automation frameworks for scalable web applications. Strong expertise in Selenium WebDriver (Java), TestNG, and Page Object Model (POM), with solid experience in API validation using Postman. Possess foundational knowledge of CI/CD concepts with exposure to Jenkins-based automation integration.

Experienced in developing reusable test components, improving automation reliability, and reducing regression effort through optimized test design. Skilled in debugging failures, performing root cause analysis, and stabilizing flaky test cases. Strong understanding of Agile methodologies, SDLC/STLC processes, and cross-browser testing. Familiar with AWS basics, SQL, MongoDB, Git, and leveraging AI-powered tools such as ChatGPT and GitHub Copilot to improve productivity and test efficiency.

WORK EXPERIENCE

Senior QA Engineer – STEEPGRAPH SYSTEM PVT. LTD., Pune (Aug 2021 – Present)

Project: Local 3PP Web Flow Application.

- Maintain and enhance existing test automation frameworks built using Selenium WebDriver with Java.
- Develop reusable methods and utilities to improve framework scalability and reduce code duplication.
- Refactor and optimize automation scripts to improve execution stability and maintainability.
- Design and implement new test cases based on functional requirements and change requests.
- Automated 400+ test cases and reduced more than 70% of manual test execution efforts in regression testing across apps
- Performed Functional, Integration, System, Regression, API, Compatibility, and Security testing
- Integrate automated test suites into CI/CD pipelines using Jenkins.
- API validation using Postman to support end-to-end automation scenarios.
- Analyze failed test cases, debug issues, and implement fixes to improve automation reliability.

Project: TAS (Test Automation Framework: PLM 3DEXPERIENCE (ENOVIA))

- Participate in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.
- Interacted with customers and conducted demos showcasing application functionalities and new enhancements.
- Refactor and optimize automation scripts to improve execution stability and maintainability.
- Analyzed and debugged failed automation scripts, resolved flaky tests, and improved execution reliability.
- Performed Functional, Integration, and Regression testing to ensure application stability and release readiness.

TECHNICAL SKILLS:

- | | |
|--|--|
| • Languages: Core Java, Node JS, Express JS | • Databases: SQL, MongoDB |
| • Automation: Selenium WebDriver, TestNG Framework, Page Object Model (POM), Playwright + JavaScript | • Version Control Tool: JIRA, GIT |
| • API Testing: Postman and Rest Assured API | • Testing: Functional, Regression, Integration, API, Compatibility |

EDUCATION:

BATCHLOR OF COMPUTE APPLICATION (BCA-2018): MODERN COLLEGE OF ARTS, SCEINCE AND COMMERCE PUNE -05
